Transitional Shades

Small Cassette
Installation Instructions

Before Installing

Remove shade from the package. Keep all packaging until shade operates to your satisfaction. Contents of your hardware package may vary depending on options chosen.
Additional fasteners may be needed on your specific mounting surface (not included).

## Tools Needed

| Pencil | Screw Driver | Level | Measuring tape | Drill |

Shade Width	Brackets Required	2-on-1 Headrail
15" - 48" 48 1/16" - 72" 72 1/16" - 90" 90 1/16" - 120" 120 1/16" - 156"	2 3 4 5 6	If installing a 2-on-1 headrail: one bracket is required to be located at the Center Gap

Step 1 — Space Brackets in Window

Measure 2" in from each end of the headrail and mark the bracket location on the mounting surface.

Space additional brackets evenly between the end brackets and mark the bracket location on the mounting surface
2" Max → ← Space Evenly → ← Space Evenly → ← 2" Max
Note: install brackets into studs or headers when possible, and space evenly

If spacer blocks are being used, place in between mounting surface and bracket before attaching with screws

IMPORTANT: Brackets need to be Level and Aligned
**Shimming Brackets may be required**

NON-MOTORIZED

Install the Brackets

Use two screws to secure to the mounting surface

**INSIDE MOUNT**   **OUTSIDE MOUNT**

MOTORIZED

Step 2   **Install the Brackets**
Use two screws to secure to the mounting surface
INSIDE MOUNT   **OUTSIDE MOUNT**

IMPORTANT: Two screws are needed to attach each installation bracket

Step 3	**Install the Shade**

**Center Shade with Window Opening**

Rest the front tab of the headrail on the spring loaded tab of the mounting bracket

Using DIRECT force, push headrail into spring loaded bracket
Tilt shade from the bottom away from the window

Push back of headrail up until it snaps into place

*headrails shown from side without shade or end caps.

Step 4	**Operate the Shade**

Clutch

Pull gently on the back side of the chain to to lower it.

Pull gently on the front side of the chain to to raise it.

Accu-Rise

Find the Center of your Bottom Rail

Snap the Handle onto the rail in the center position
Pull Accu-Rise shade gently from the Handle to lower it.

Push up from center to raise it.

Troubleshooting:
If shade doesn't raise, the roller may be binding on the internal brackets.
Remove End Caps and gently pry the internal bracket away from the roller so that it moves freely
Installers MUST INSTALL Cord Tension Lock Properly

## Mark Mounting Position

Lower shade to make sure the Cord Tension Lock is not placed in the path of the bottom rail or fabric
Outside Mount   **Inside Mount**
Insert the nub of the Bracket into the Tensioner Center Hole

Pull the Chain taut with the Bracket on the mounting surface

Slide the Bracket and the Tensioner Center down to the Guide Lines on the Cord Tensioner

The Center Hole of the Tensioner must be aligned with the guide lines

While holding the lock firmly in place, check that the loop can move freely through the Tensioner
Mark the Bracket location on the Mounting Surface

If the Bracket is not Aligned properly:

If the Tensioner locks onto the loop, it is too loose and the bracket and lock should be **moved down**

If the loop does not run freely through the lock, it is too tight and the bracket and lock should be **moved up**
## Attach the Bracket to Mounting Surface

Outside Mount   **Inside Mount**

Move Tensioner out of the way and attach to Mounting Surface with the Two Longer Screws provided

Attach the Cord Tension Lock to Bracket

Pull the Tensioner's spring loaded Slider down to the bracket

a small tool may be helpful in moving the slider

Make sure the Tensioner's Center Hole is seated on the nub of the bracket

Use the small screw to attach Tensioner

Do not Overtighten

**Outside Mount**   **Inside Mount**

P-Clip Safety Tensioner

Position the Tensioner

Lower shade to make sure the P-Clip is not placed in the path of the bottom rail or fabric
Determine the
orientation of the P-Clip
Tensioner

With the shade securely installed, pull the chain taut then
relax the chain slightly then Mark the location of the P-Clip

Install the Tensioner

Make sure that the cord or chain is taut and moves freely through the Tensioner

Then secure to the mounting surface using the screw provided

IMPORTANT: the Tension Lock must be properly secured to the wall or window frame to reduce a child's access to the chain or cord loops.
Young children and pets can wrap chains around their necks and strangle themselves.
Magnetic

Remove Film from
Magnet strips and
attach to Top and
Bottom of the Rail

Determine the orientation
of the Hold Down Bracket

Lower the shade to the
closed position and mark
the Bracket location where
it attaches to the TOP of
the Rail

This allows the vanes to be
opened while still attached
to the bracket

Secure HoldDown to the wall

## Step 6   **Install Hold Down (optional)**

Traditional

Lower the shade to the closed position

line up the Hold Down bracket where the pin on the Rail is at the bottom of the Hold Down Slot

This allows the vanes to be opened while still in the bracket
Attach Bracket to mounting Surface

Rotate the bottom rail to get the pins into the brackets

Shade Removal

Use **DIRECT** force to push the shade into the spring loaded tab on the mounting bracket

Tilt bottom of the shade down and away from the bracket to remove
