Jackson Schaefer

Indicators That You May Be

A Victim of

The majority of identity theft victims do not realize that they are a victim until it has negatively impacted their lives. Many people do not find out that their identities have been stolen until they are contacted by financial institutions or discover suspicious activities on their bank accounts. It is therefore of great importance to watch out for warning signs that your identity has been compromised. The following are ten indicators that someone else might be using your identity.

1. Credit or debit card charges for goods or services you are not aware of, including unauthorized withdrawals from your account.
2. Receiving calls from credit or debit card fraud control department warning of possible suspicious activity on your credit card account.
3. Receiving credit cards that you did not apply for.
4. Receiving information that a credit scoring investigation was done. They are often done when a loan or phone subscription was applied for.
5. Checks bouncing for lack of enough money in your account to cover the amount. This might be as a result of unauthorized withdrawals from your account
6. Identity theft criminals may commit crimes with your personal information. You may not realize this until you see the police on your door arresting you for crimes that you did not commit.
7. Sudden changes to your credit score may indicate that someone else is using your credit cards.
8. Bills for services like gas, water, electricity not arriving in time. This can be an indication that your mail was stolen or redirected.
9. Being not approved for loans because your credit report indicates that you are not credit worthy.
10. Receiving notification from your post office informing you that your mails are being forwarded to another unknown address.
