What is Certified Best for Kids™?

Best for Kids™ requires manufacturers who want to be part of the program to meet stringent criteria and submit appropriate products to a third party testing laboratory recognized by Window Covering Manufacturers Association (WCMA). To become certified, these products either have no operating cords or inner cords that are not accessible. If accessible inner cords are present in products with no operating cords, they cannot create a hazardous loop or potential wrap-around hazard.

Child Safe Options Explained:

Accu-Rise® Cordless

Our Accu-Rise® cordless operation is suitable for larger blinds and shades and available on the optional Top-Down / Bottom-Up Lifting System (for Parasol® Cellular Shades). Accu-Rise® allows you to raise and lower the blinds or shades with the simple touch of your fingers. Operating cords are eliminated for a clean, uncluttered look. No worries about children or pets becoming entangled in hanging cords or controls!

CareRING™ Cordless

All our roman shades come standard with the TLC cord sleeve and we've taken extra care to make them even safer. Our CareRING™ Cordless Control eliminates dangling lift cords, taking child safety precautions to the next level for added confidence and comfort. Simply reach for the CareRING™ hidden on the back of the bottom hem of the shade to effortlessly raise and lower the shade to the desired position.

Glissade™

Glissade™ offers a safe vertical solution for sliding glass doors, very large windows, or as a room divider. No operating cords or chains necessary, simply slide side to side with a touch of your hand.

Lift & Lock™

Lift & Lock™ is a budget friendly, child-safe option for 2" and 2 1/2" horizontal blinds and cellular shades. Raise and lower the blind with the press of a button or simply tilt the blind with the twist of a color-coordinated wand.

Motorization (Lift, Tilt & Lift, Tilt Only)

We offer a wide variety of window fashions with motorized options that eliminate the need for lift cords, providing ultimate convenience and superior operation. Motorized window coverings are easy to control via remote or wall switch and create a safer environment for children. This provides peace of mind for you by eliminating dangerous cords.

Sure-Lift™ Retractable Cord

The Sure-Lift™ system operates safely on shades with one retractable cord designed to stay out of the reach of small children. Whether the shade is raised or lowered, the cord stays at the same length, making it less accessible to little ones.

Wands

Replacing tilt cords with wands is a simple way to keep children and pets safe. The wand draw option for vertical applications is a great solution too.

Other Child Safe Alternatives:

Custom shutters from Lafayette are cordless by design and provide an elegant, child-safe solution for homes with young children.

Window Coverings & CHILD SAFETY

As you childproof your home, don't forget your window treatments. These seemingly harmless products are a potential hazard for your little ones (and pets too).

ACCIDENTS HAPPEN

271

cases of child death in the U.S. since 1990 were due to unsafe window coverings.

94.3%

of those recorded deaths were due to entanglement involving window cords.

16,827

children in the US were treated for injuries caused by window treatments between 1990 and 2015.

75.7%

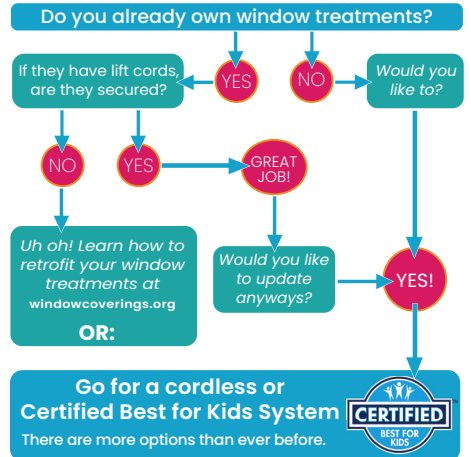

of reported injuries involved horizontal blinds -the most common product in homes.

THE GOOD NEWS?

Thanks to collaborative efforts between the window fashions industry and the Window Covering Safety Council, it's easy to identify problems and discover child-safe window treatment solutions.

Accidents are preventable.

STEPS TO TAKE TODAY

Move cribs, furniture, and toys away from windows with corded coverings.

Check the windows at the places your child visits and plays often:

Ensure windows retrofitted with cord cleats¹ or cord tension locks² are installed properly and out of reach.
