## “Arnold Unknown The Complete, Untold Life of the Maine Legend Walter Lewellen Arnold by Scot Dahms”

Scot Dahms has produced another excellent and very detailed trapping book, this time about famous Maine trapper and lure maker Walter Arnold. This is Mr. Dahms fifth book on legendary trappers. This book like the others, contains over 300 pages of very detailed events of Mr. Arnold’s life. Everything from his hunting, fishing, trapping, logging, woodsmanship and lure making activities are covered. But what I found interesting was the family history and different life events that effected Mr. Arnold’s career.

His family life, friendships, business strategies and daily practices are all related. The reader gets a glimpse of the wild areas of Maine and the slow spread of development during Mr. Arnold’s life. Several other well known trappers and hunters of the time are also related to the reader. The many pictures alone in this book tell of the hard times that the people of Maine encountered in the early 1900s.

It seems that Mr. Arnold thrived in the harsh Maine wilderness. The reader gets a feel of just how tough trapping and hunting were during those times;

and what it took to survive. What also becomes obvious is the fact that Mr. Arnold was a hard worker that made things happen. For more information on this book “Arnold Unknown” and Mr. Dahms other books go to:
