

2025 GateGuard® System

HD Series 2-Way Radio Callbox/Wireless Intercom

Keep Your Facility Secure!

The GateGuard System is a package of pre-programmed radios designed to provide an out-of-the-box solution for long-range **2-way voice communication AND remote gate activation.**

Products Included:

Made in USA

The **Ritron desktop base radio**, mounted on a desk or a wall, provides a fixed communication point and remote gate control.

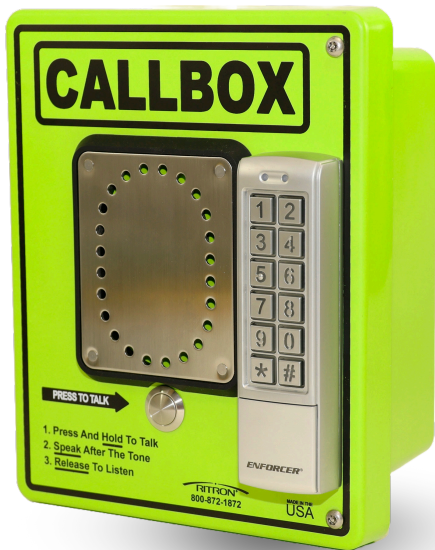

Portable radios allow personnel to communicate with visitors as well as remotely control the gate from anywhere in the facility.

The **HD Series Radio Callbox** mounts at the gate to provide wireless communication and direct connection to gate control.

Industrial-grade, long range (miles NOT feet), wireless 2-way voice system allows for remote gate control from portables or base stations.

*Callbox shown with optional keypad
