### Special Projects 47-188 SKULL

Remember when CoVid first hit and all of us were trying to figure out first, if we were “essential”; and then why we were if we were? Everything slowed waaayyyy down. We found ourselves with extra time! So with a little inspiration from another customer project, we decided we’d see just how interesting, detailed and magnificent we could make a tire thumper.

The result is what you see above! We flame colored the steel after welding and gave it a clear coat finish.

Pin pullers include your choice of:

- 180 degree or 45 degree end
- 32.5” in overall length
- Powder coated steel
- .375 diameter wire w/ 1” x 5” solid bar welded - on construction.
