

PS Green Product Information

Wedding Classic™ Resin Folding Chairs

We are currently using a portion of regrind plastic (from our own defective parts) in our resin wedding chairs manufacturing process. These percentages are as follows:

| | |
|------------|-------|
| C440 white | 14.6% |
| C450 white | 33.0% |

PremierComfort™ Banquet Seating

Our steel frame is nearly 100% recycled steel. We also offer fabrics made with olefin, a fiber manufactured from postindustrial waste.

Classic Series™ ABS Lightweight Plastic Tables

50% of the ABS plastic used on our ABS tables is regrind material.

End of Product Life

Although all PS products are built to withstand years of demanding use, they will eventually reach the end of their useful lives. We suggest to all of our customers recycling of the products when this time comes.

ENVIRONMENTAL POLICY

PS Event Furniture is a recognized market leader in providing high quality portable event furniture products. PSEF holds environmental management as one of the highest corporate priorities.

As a responsible member of the business community, PSEF makes the following Environmental Policy Statement an explicit and integral part of our corporate business objective and operating philosophy.

Energy

Strive for improved energy conservation in existing operations. Invest in technologies and systems that enhance energy conservation. Include energy management as an integral part of all planning for future projects.

Environmental Impact

Identify and understand the direct and indirect impact that PSEF facilities, operations, business practices, products and services may have on health, safety and the environment. Identify potential areas of concern and develop pro-active guidelines.

Conservation

Promote wildlife and habitat conservation through procuring materials from renewable sources.

Education

Educate PSEF employees on the content of this Environmental Policy Statement and encourage them to think and act environmentally on the job and at home.

Products and Services

Develop products and services with no undue environmental impact and are safe in their intended use, that are efficient in their consumption of energy and natural resources, and that can be recycled, reused, or disposed of safely.

Waste Minimization

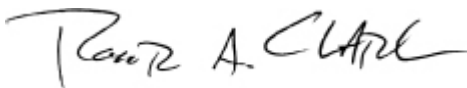

Minimize the creation of wastes in our operations and business activities. Dispose of wastes conscientiously and creatively by encouraging a reduce/reuse/recycle mentality, and by developing programs and facilities that promote this attitude.

Laws and Regulations

Make every effort to understand and adhere to, not only the spirit, but the letter of environmental laws and regulations. Work to identify issues that may not yet be identified in the law, but could result in adverse environmental effects. Strive to exceed required levels of compliance wherever feasible.

Cooperation

Seek business relationships with companies that demonstrate environmental ethics. Encourage vendors, suppliers and participant companies to conduct business in an environmentally responsible manner.
